

## K9 Lifestyle and Vaccinations

### Does your dog do any of the following?

- Spend time outdoors?
- Go hiking?
- Go to doggy daycare?
- Visit dog parks?
- Join you for runs or walks around the neighborhood?

If you answered yes to any of these activities, make sure to ask your veterinarian about Fear Free lifestyle dependent vaccinations such as Elanco's highly purified ½ mL TruCan™ Ultra vaccines, TruCan™ B (Oral) for Bordatella, or TruCan™ Lyme/Lepto combination vaccines.

Not only do these vaccines round-out your dog's level of protection against infectious diseases, with their lower volume or combinations and ease of administration, these vaccines ensure that your pet will continue to love going to the vet!

Keep your dog protected so that you can continue to spend quality time together and they can enjoy their favorite activities! Be sure to talk with your veterinarian today about which Elanco vaccines are recommended for your dog's lifestyle and geographic location.
